

Entry-level driver training certificate handoff fork

Blanks when the theory vendor issues the **ELDT certificate** to the school vs the student. Force written who receives / holds the certificate. Invents no ELDT rules. Pairs ELDT provider split + entry-upgrade. Independent — not FMCSA. **Not legal advice.**

- **Order:** provider split → this handoff fork → [entry-upgrade](#) → deposit.
- School “we handle ELDT” talk ≠ who holds your certificate.
